Yongqi Dong, PhD

https://yongqidong.github.io/

Research Group Leader / Senior Postdoc Researcher (TV-L E-14.2), RWTH Aachen University
Chair of IEEE ITSS Technical Committee on Automated Mobility in Mixed Traffic
Lead Guest Editor for Special Issue on *AI-Empowered AVs in Mixed Traffic* in IEEE T-ITS
Visiting Scholar (RWTH Theodore von Kármán Fellowship Outgoing), Monash University
Email: yongqi.dong@rwth-aachen.de | **TEL:** (+31) 0616619399 / (+86) 15201342751

EDUCATIONAL BACKGROUND

Doctor of Philosophy, Department of Transport & Planning, **Delft University of Technology** (**TU Delft**) Jan.2020-May.2025

Thesis: *Safe, Efficient, and Socially Compliant Automated Driving in Mixed Traffic: Sensing, Anomaly Detection, Planning and Control*

Advisors: Prof.dr.ir. Bart van Arem and Prof.dr.ir. Haneen Farah

Visiting PhD Researcher, Department of Mechanical Engineering, **University of California, Berkeley** May.2023-Oct.2023

Topic: *Towards Socially Compliant Automated Driving Modelling and Conceptual Design*

Advisor: Prof. Masayoshi Tomizuka (*Member of the U.S. NAE; Life Fellow of IEEE and ASME; Fellow of the IFAC*)

Master of Control Science and Engineering, Department of Automation, **Tsinghua University** Sep.2014-Jul.2017

Minor: Master Certificate Project for Improving Ability in *Big Data and AI*

Thesis: *Data-Driven Analysis on Group Behaviors of Taxi Drivers and Ridesourcing Drivers*

Nominated for Tsinghua University Outstanding Master's Thesis Award

Advisors: Prof. Zuo Zhang and Prof. Li Li (*IEEE Fellow*)

Bachelor of Telecommunication Engineering Sep.2010-Jul.2014

School of Electronic and Information Engineering, **Beijing Jiaotong University**

GPA: 91.5/100 | Rank: 1/202 | Postgraduate Recommendation to Tsinghua University without Examination

Thesis: *Design of vehicle-mounted data acquisition & communication unit for the WMN-based locomotive remote control*

Outstanding Undergraduate Thesis

ACADEMIC APPOINTMENTS & PROFESSIONAL EXPERIENCE

Research Group Leader | AI & Automated Mobility Group | **RWTH Aachen University** Jun.2024-Present

- **Research proposal development, coordination, and writing**: German Research Foundation (DFG) and mFUND
- **(Co-) PI and coordinator**: Lead proposal writer and coordinator for 3 DFG research proposals & 1 mFUND proposal
- **Lead** the group and supervise the PhD/MSc students
- **Teaching support** for courses: *Institute Internship in Road Engineering* and *Machine Learning in Civil Engineering*

Visiting Scholar (RWTH Theodore von Kármán Fellowship - Outgoing Scholar) | **Monash University** Aug.2026-Sep.2026

PhD Researcher | **TTS Lab** | Department of Transport & Planning | **TU Delft** Dec.2019-Jun.2024

- Carried out PhD research work under the Dutch Research Council (NWO) funded SAMEN project
- Contributed to teaching assistance and evaluation support for various courses and supervised seven MSc students
- Published scientific papers and patents, presented research work at conferences, and organized workshops

Visiting PhD Researcher | **MSC Lab** | Department of Mechanical Engineering | **UC Berkeley** May.2023-Oct.2023

- Carried out the literature review and research work related to *Socially Compliant Automated Driving*

Research Assistant | Waterloo Artificial Intelligence Institute | **University of Waterloo** May.2018-Sep.2019

- Carried out research work related to applied Machine Learning, Artificial Intelligence, and Big Data in Transportation

Research Assistant | Transport Data Analyst | **ITS Lab, TNList @ Tsinghua University** Aug.2017-May.2018

- Cross-domain data fusion for trip chain reconstruction, spatial-temporal patterns mining, and anomaly detection
- City computing: Applying NMF methods to evaluate indicators describing urban function, land use, mobility, etc.

RESEARCH GRANTS & FUNDED PROJECTS

Sole Principal Investigator (PI) | RWTH Aachen Exploratory Research Space Seed Fund Jul.2026-Present

Vision-Language Model Enhanced Driving Risk Field Modeling for Socially Compliant Automated Vehicles in Mixed Traffic

Lead PI | 2026 IEEE Intelligent Transportation Systems Society (ITSS) New Initiative Mar.2026-Present

LLM-Enhanced Next-Gen Reviewer Ecosystem: Cultivating Interdisciplinary Excellence and Reproducibility in Mixed Traffic Mobility

Sole PI | RWTH Aachen International Research Space Competitive Fund Jan.2026-Oct.2026

Segmentation-enhanced Driving Risk Field for Socially Compliant Automated Driving in Urban Mixed Traffic

Key Researcher | European Regional Development Fund & State of NRW Germany Mar.2025-Present

ViBeS: Virtual Ride-Through for Participatory Road Infrastructure Planning

Sole PI | 2024 IEEE ITSS New Initiative (Competitive Funding) Mar.2024-Dec.2024

Interdisciplinary Research Towards the Deployment of Automated Vehicles in Mixed Traffic

Lead Applicant | TU Delft-Transport Institute Interdisciplinary Research Award May.2023-Oct.2023

Socially Compliant Automated Driving Modelling, Expert Insights, and Conceptual Design

Sole PI | 2023 IEEE TAB Committee on Standards (TCoS) Competitive Seed Funding Mar.2023-Dec.2023

Enhancing the Deployment of Socially Compliant Automated Vehicles in Mixed Traffic

Key Researcher | Dutch Research Council (NWO) Jan.2020-Jan.2024

SAMEN: Safe and Efficient Operation of AutoMated and Human DrivEN Vehicles in Mixed Traffic

HONORS & AWARDS

❖ **2025 Best PhD Thesis Award** (**Sole Recipient**) - *Applied System Innovation* (*ASI*; Q1 Journal) | Awarded Oct. 2026

❖ 2026 RWTH Exploratory Research Space (ERS) Start Fund (**19,927 €**)

❖ 2025-2026 RWTH Aachen Theodore von Kármán Fellowship for Outgoing Scholars (**7,362 €**)

❖ 2026 & 2025 Outstanding Innovation & Entrepreneurship Award for Chinese Overseas Scholars (Chunhui Program)

- 2026 & 2024 IEEE ITSS New Initiatives Proposal Funding (2* **5,000 $**)
- 2025 Entrepreneurs Next Star & Million Prize Global Challenge (German AI+ Deep-Tech) Third Prize (**6,000 €**)
- 2025 Seed Track Winner of Changping Digital Economy Science and Technology Innovation Competition (CDIC)
- TU Delft-Transport Institute Interdisciplinary Research Award (**10,500 €**)
- 2023 IEEE TAB Committee on Standards (TCoS) seed funding (**6,000 $**)
- 2022 Chinese Award for Outstanding Self-financed Students Abroad (**6,000 $**; ~ 10 recipients in the Netherlands)
- IEEE ITSS Young Professionals Fellowship (Twice)
- Erasmus+ mobility Grants (Twice)
- National Scholarship (**Top 1‰**)
- Outstanding College Graduates of Beijing (**Top 1%**)
- First-Class Tsinghua University RONG Scholarship
- First-Class Academic Fellowship (**Top 1%**, twice) and Merit Student (Four times)
- Second Prize in the 2012 & 2013 Undergraduate Electronic Design Contest in Beijing
- Bronze award in the "Challenge Cup" Entrepreneurship Design Contest in Beijing
- First Prize in Freescale Cup University Students Intelligent Car Race (**Rank 2nd**)
- Second Prize in the Physical Experiment Competition in Beijing
- 2019 Microsoft Discover AI Challenge: *Sustainable Life* | Data-Driven All-in-one Shared Mobility | Top (10%)

ACADEMIC LEADERSHIP & SERVICE

Technical Committee Leadership

Technical Committee Chair | Automated Mobility in Mixed Traffic | IEEE ITSS — Jun.2025-Present

Establishing and chairing the interdisciplinary community: "*Automated Mobility in Mixed Traffic*"

Journal Editorial Leadership

Lead Guest Editor (Special Issue(SI)) | *Vehicles* — Sep.2026-Present

Advances in Perception, Planning and Control for Automated Vehicles

Lead Guest Editor (SI) | *IEEE Transactions on Intelligent Transportation Systems* — Sep.2025-Present

AI-Empowered Automated Driving in Mixed Traffic: From Sensing, Perception, to Planning and Control

Conference Workshop and Invited Session Organization

Invited Session Lead Organizer | 29th IEEE ITSC 2026, Naples, Italy — Sep.16-18, 2026

Session title: AI-Empowered Automated Driving in Mixed Traffic

Workshop Co-Organizer (Deputy Coordinator) | 29th IEEE ITSC 2026, Naples, Italy — Sep.15, 2026

Workshop title: Automated Mobility in Mixed Traffic: *Robust, Human-Centric, and Trustworthy Systems*

Workshop Lead Organizer & Coordinator | 28th IEEE ITSC 2025, Gold Coast, Australia — Nov.18, 2025

Workshop title: Automated Mobility in Mixed Traffic: *Emerging Mixed Autonomy in the Era of AI*

Workshop Lead Organizer & Coordinator | 27th IEEE ITSC 2024, Edmonton, Canada — Sep.24, 2024

Workshop title: *Automated Mobility in Emerging Mixed Traffic*

Workshop Co-Organizer (Deputy Coordinator) | 26th IEEE ITSC 2023, Bilbao, Spain — Sep.24, 2023

Workshop title: *Data-driven and Empirical Research for Emerging Mixed Traffic of Automated Vehicles and Human-driven Vehicles*

Workshop Lead Organizer & Coordinator | IEEE IV 2023, Anchorage, USA — Jun.04, 2023

Workshop title: *Development of Socially-compliant Driving Behavior for Automated Vehicles to Enhance Safety and Efficiency in Mixed Traffic*

Project title: *Enhancing the deployment of socially-compliant automated vehicles in mixed traffic*

THESIS SUPERVISION

Tingyu Guo (co-supervision) | PhD in Traffic Engineering, Chang'an and RWTH Aachen Mar.2026-Present

Topic title: Explaining Traffic Conflict Severity at Intersections: 2D-MTTC and Explainable Machine Learning Approach

Bhargav Sridhar (co-supervision) | PhD in Highway Engineering, RWTH Aachen University Jan.2025-Present

Thesis title: AI-Driven Prioritization of Emergency Vehicles and Vulnerable Road Users in Urban Traffic

Zhihao Li | MSc. in Robotic Systems Engineering, RWTH Aachen University Mar.2026-Oct.2026

Thesis title: Performance Evaluation and Sim2Real Gap Analysis of Generative World Models for Automated Driving

Bashar Saadeh | MSc. in Traffic Engineering and Mobility, RWTH Aachen University Nov.2024-Jul.2025

Thesis title: Design Socially Compliant Automated Vehicles in Mixed Traffic: Insights from Questionnaire-based Survey

Yuteng Zhang | Master of Science in Transport, Infrastructure & Logistics, TU Delft Jan.2024-Nov.2024

Thesis title: Coordinated Planning and Control for Connected and Automated Vehicles' On-ramp Merging in Mixed Traffic Through Value Decomposition-based Multiagent Deep Reinforcement Learning

Cesar Flores Reyna | MSc. in Sustainable Mobility Transitions, EIT, TU/Eindhoven Jan.2024-Nov.2024

Thesis title: Investigating a Benchmarking Framework for the Large-Scale Micro Simulator (LSMS) Platform in Freeways under Dynamic Speed Limits

Mathijs den Otter | MSc. in Civil Engineering–Transport and Planning, TU Delft Sep.2022-Dec.2023

Thesis title: Impact of Improved Lane Marking Properties on the Performance of LKA Systems in Varying Circumstances

Lanxin Zhang | MSc. in Civil Engineering–Transport and Planning, TU Delft Oct.2022-Jun.2023

Thesis title: Semi-supervised Machine Learning for Abnormal Driving Behavior Detection

Henan Yuan | Bachelor in Traffic and Transportation, BJTU & TUDelft TTE Oct.2022-Jun.2023

Thesis title: Deep Reinforcement Learning for Driving through Roundabouts

Shiva Nischal Lingam | MSc. in Civil Engineering–Transport and Planning, TU Delft Jan.2021-Nov.2021

Thesis title: Effects of External Human Machine Interfaces on Automated Vehicles' Communicative Interactions With Human Drivers (Cum Laude) | Won 2nd Cuperusprijs prize of KIVI

Sandeep Patil | MSc. in Mechanical Engineering (Vehicular Engineering), TU Delft Oct.2020-Aug.2021

Thesis title: Lane Detection using Spatial-temporal Attention

Eline van der Kooij | MSc. in Transport, Infrastructure & Logistics, TU Delft Jul.2020-May.2021

Thesis title: Visibility of Lane Markings for Machine Vision

Sanny Toonen | Bachelor of Science in Civil Engineering-Transport and Planning, TU Delft Jul.2020-May.2021

Thesis title: Lane Recognition for Automated Vehicles

TEACHING ACTIVITIES

Lecturer and Project Supervisor | Institute of Highway Engineering, RWTH Aachen Jan.2025-Oct.2026

Courses: Institute internship in road engineering

Project Supervisor, Instructor | EEMCS, TU Delft Nov.2022-Feb.2024

Courses: Advanced Interdisciplinary AI Project (AI2P) (IFEEMCS520201); Capstone Applied AI Project (T13150TU) Fundamentals of Artificial Intelligence Programme (IFEEMCS520100); Computational Intelligence (CSE2530)

Teaching Assistant, Instructor | TU Delft and BJTU joint bachelor program Mar.2022 & Mar.2023

Course: Advanced Lecture "Trends in Transportation" 2022 & 2023

Lecturer | DakeOffer online Platform Mar.2020-Jun.2020 & Nov.2020-Jan.2021

Course: Introduction to Big Data and Artificial Intelligence: Fundamentals and Practice

Teaching Assistant | Transport and Planning, TU Delft Apr.2020-Aug.2020 & Apr.2021-Aug.2021

Course: CIE5805 – Intelligent Vehicles for Safe and Efficient Traffic

RSI Tutor | Center for Excellence in Education, USA Jul.2017-Aug.2017

Research writing and presentation tutor for the 2017 Research Science Institute Program at Tsinghua University

Teaching and Lab Assistant | Department of Automation, Tsinghua University Sep.2015-Jan.2017

Courses: Data Ethics, Advanced Labs in Electronic Technology, Fundamentals of Electronics Power Technology

Undergraduate Counselor (Class 2012) | School of EIE, Beijing Jiaotong University Jul.2012-Jul.2014

TALKS & PRESENTATIONS

Optimization for Shared & Sustainable Mobility | IEEE ITSC 2025, Gold Coast, Australia Nov.19.2025

Presentation topic: A Self-Supervised Transformer for Unusable Shared Bike Detection

Human-Inspired Interactive Autonomous Driving | IEEE ITSC 2024, Edmonton, Canada Sep.26.2024

Presentation topic: Towards Understanding Worldwide Cross-cultural Differences in Implicit Driving Cues

Promoting Diversity and Leadership in ITS | IEEE WiE/YP Workshop & Forum, Cairo, Egypt Nov.21.2023

Presentation topic: Resource Repository: Datasets, Simulation Platforms, and Relevant Publications for Emerging Mixed Traffic of Automated Vehicles and Human-driven Vehicles

Automated Road Transportation | TRB ARTS 2023, San Francisco, USA Jul.12.2023

Presentation topic: Social-aware Planning and Control for Automated Vehicles Based on Driving Risk Field and Model Predictive Contouring Control: Driving through Roundabouts as a Case Study

AI Applications in Transportation Planning | TRB 2023, Washington, D.C., USA Jan.11.2023

Presentation topics: (1) Robust Lane Detection through Self Pre-training with Masked Sequential Autoencoders and Fine-tuning with Customized PolyLoss

(2) Sequential Neural Network Model with Spatial-Temporal Attention Mechanism for Robust Lane Detection Using Multi Continuous Image Frames

Connected and Automated Vehicles | MFTS 2022, Dresden, Germany Dec.01.2022

Presentation topic: Towards Developing Socially-Compliant Automated Vehicles: State of the Practice, Expert

Expectations, and a Conceptual Framework

Automated mobility | IEEE ITSS Young Professionals Fellowship Symposium, Chania, Greece Nov.25.2022

Presentation topic: Multi-goal Proactive Traffic Management for Mixed Traffic of Automated Vehicles (AVs) and Human-Driven Vehicles (HDVs) Using Explainable Physics-Informed Artificial Intelligence

AI, Security, Privacy and Safety Systems in ITS Applications| ITSC2022, Macau, China Oct.08.2022

Presentation topic: Comparative Study on Supervised *vs* Semi-supervised ML for Anomaly Detection of CAN Network

Research on AI and Advancing Computing Applications | TRB 2022, Washington D.C., USA Jan.12.2022

Presentation topic: A Hybrid Spatial-temporal Sequence-to-one Neural Network Model for Lane Detection

RESEARCH EXPERIENCE

AI & Automated Mobility Group | Institute of Highway Engineering | **RWTH Aachen University** Jun.2024-Present

- **Vision-Language Model Enhanced Driving Risk Field Modeling for Socially Compliant Automated Vehicles in Mixed Traffic** (PI, *RWTH ERS Start Fund with 19,927 €*)
- **AIMo-D²RF: AI-**Enhanced Hierarchical **M**ulti-**O**bjects **D**riving **R**isk **F**ield Model --- Integrating Physics-Based and Human Perception-Based Approaches with Drivers' **D**istraction Consideration (PI, *Individual DFG*)
- **Explainable Mathematics-Enhanced AI Model for Multi-Modal Urban Traffic Prediction and Simulation** (Co-PI and coordinator, *DFG Research Unit Proposal*)
- **CycleVLA:** Explainable Vision-Language-Action and Cycling Risk Field Modeling for Safe and Human-Centered Cycling Navigation in Urban Mixed Traffic (PI and coordinator, *DFG Package Proposal*)
- **Parameter-Efficient Fine-Tuning of Pretrained Multimodal Large Vision Model (LVM) for Privacy-Preserving Traffic Anomaly Detection with Thermal Imaging**
- **ViBeS: Virtual Ride-Through for Participatory Road Infrastructure Planning** (Project Researcher & Practitioner)
- **Digital Twin for Cycling Interaction in Mixed Traffic: A Multi-Sensor Data Fusion and VR Simulation Approach with CycleScene Benchmark (**PI, *mFUND Proposal***)**

Transport Engineering Group | **Host:** Prof. Hai Vu | **Monash University** Aug.2026-Sep.2026

- **RiskWorld: Risk-Aware World Modeling with Flow-Guided Occupancy Evolution for Selective Trajectory Planning in Automated Driving**
  - Developed a world modeling method that integrates future risk-world prediction, risk-visual fusion, and action-conditioned trajectory evaluation for safety-critical automated driving
  - Designed action rollout and safety-constrained selection to predict action-induced future risks, compare candidate trajectories, and improve planning while preserving a safe fallback to the base planner

Traffic and Transportation Safety Lab | Department of Transport and Planning | **TU Delft** Dec.2019-Jun.2024

- **Data-driven and AI-based research for expanding Automated Vehicles' Operational Design Domain in mixed traffic (part of the SAMEN project)**
  - Developed a hybrid sequence-to-one model for lane detection in extremely difficult driving scenes
  - Incorporated spatial-temporal attention for automated vehicles' perception
  - Designed reliable data-driven algorithms for anomaly and abnormal behavior prediction
  - Implemented Deep Reinforcement Learning (DRL) models for safe, reliable, and socially compliant automated driving under challenging maneuvers involving both longitudinal and lateral control
  - Gaze behavior of road users when interacting with an automated vehicle at an intersection: *Understanding cyclists' perception of driverless vehicles through eye-tracking and interviews*

Mechanical Systems Control (MSC) Lab | Department of Mechanical Engineering | **UC Berkeley** May.2023-Oct.2023

Advisor: Prof. Masayoshi Tomizuka (*Member of NAE; Life Fellow of IEEE and ASME; Fellow of the IFAC*)

- **Socially Compliant Automated Driving through DRL and Model-based Social-aware MPC**

- Reviewed state-of-the-art socially compliant automated driving methods in the literature
- Developed model-enhanced multi-agent deep reinforcement learning

Waterloo Artificial Intelligence Institute | Faculty of Engineering | **University of Waterloo** May.2018-Sep.2019

- **Applied Machine Learning, Artificial Intelligence, and Big Data Research**
  - Data-driven Anomaly Detection (Unsupervised): Auto-Encoder, Hierarchical Extreme Learning Machines
  - Kaggle Competition: Employ LSTM, LightGBM, and XGBoost to predict stock movements with news data
  - Deep Reinforcement Learning for Car Racing Control in Simulation: DQN, A3C, and PPO

Singapore-MIT Alliance for Research and Technology (SMART) Aug.2016-Sep.2016

Future Urban Mobility (FM) IRG | Project: *SimMobility* | Topic: Taxi Roaming

Advisors: Prof. Moshe BEN-AKIVA (*Member of U.S. National Academy of Engineering*),
Dr. Bat-hen NAHMIAS-BIRAN

- **Constructing a model tackling the taxi roaming (taxi service) problem, embedded into *SimMobility* platform**
  - Proposed an advisable solution of cruising along hotspots through a cell-based logit-opportunity model improved by a data-driven method
  - Participated in building the architecture of the final model embedded in *SimMobility*

Intelligent Transportation Laboratory, Tsinghua National Laboratory for Information Science and Technology (TNList) | Advisors: Prof. Zuo Zhang and Prof. Li Li (*IEEE Fellow*) Sep.2014-May.2018

Transportation Research based on machine learning and data-driven methods

- **Revealing New York taxi drivers' operation patterns focusing on the revenue aspect**
  - Developed a method for classifying drivers into 3 groups based on their revenue: top, ordinary, low earner
  - Excavated the operational patterns of different taxi driver groups through big data analytics
- **Influence of on-demand ride-sourcing *vs.* traditional taxi based on machine learning and big data analytics**
  - Uncovered the differences between taxi service and ride-sourcing using big data analysis and clustering
  - Applied non-negative matrix factorization (NMF) to obtain basis patterns of Taxi, Hitch, and Express service
- **Fundamental research on intelligent parking guidance and recommendations based on machine learning**
  - Forecast models of travel time to parking lots (*RF*); Guidance, optimization, & personalized recommendation

LEADERSHIP & VOLUNTEER EXPERIENCE

Webmaster | Traffic and Transportation Safety (TTS) Lab Website, TU Delft Mar.2020-Jun.2024

- Responsible for volunteering for the TTS Lab website development and maintenance

Project Leader | Asian Youth Center: Leadership Development Training Program for Masters Jul.2015-Aug.2016

- Responsible for activities and competitions between overseas and Chinese students in the Asian Youth Center
- ***Volunteer Leader*** in the 5th Joint School Symposium for the Asian Youth Center Project

iTalk Group Leader | International Department, Tsinghua University Postgraduate Association Oct.2014-Oct.2015

- Committed to speeches in English given by students or alumni stars; held a special performance for overseas students

Volunteer | National Doctor Forum on Traffic and Transportation Engineering, Beijing Jiaotong University Jun.2011

SKILLS & MISCELLANEOUS

- Programming: Python (PyTorch, TensorFlow, Keras), MATLAB, R, C/C++, Java, VHDL | Database: MySQL
- AI Certificates: Deep Learning, Deep Reinforcement Learning, TRAIL Research School Diploma
- Big data analytics and visualization methods | Cross-domain Data Fusion | Data-driven anomaly/fraud detection
- Languages: Chinese (Native); English (Professional); Dutch (Elementary)
- Hobbies: **Tai Chi, Kung Fu**, **Meditation**, Yoga, Reading, Mountain Hiking
